

AP Cost Calculator Report

Show them exactly what they're overpaying. In writing.

We take the prospect's monthly invoice volume and AP headcount, run the numbers through our cost model, and produce a branded one-pager showing their exact annual savings potential. This is a document they can hand directly to their CFO to build the internal business case. Most hotel groups processing 5,000 invoices per month are overpaying by \$60,000-\$105,000 per year in AP labour costs alone.
