

F&B GP% Baseline Model

See your food cost performance before the invoice arrives.

For hotel groups with food and beverage operations, the most persistent finance problem is visibility: you only know what your GP% is when the invoices post, 30 to 45 days after the purchasing decisions that drove those costs were made. Our F&B GP% Baseline Model shows exactly what your current cost trajectory looks like, built from your outlet structure and purchasing data.

30-45 days
TYPICAL LAG IN
F&B COST VISIBILITY

Real-time
GP% WITH
PURCHASEPLUS

Outlet level
VISIBILITY PER OUTLET,
PER PROPERTY, GROUP

WHAT YOU GET

- GP% baseline model built from your current outlet structure and data
- Outlet-level, property-level, and group-level cost visibility mapping
- Gap analysis: current visibility vs commitment-based real-time reporting
- Visualisation of what live GP% tracking would have shown last quarter
- Delivered as a branded report within 10 business days of data intake

HOW IT WORKS

Complete a brief intake form at Booth 3715. Provide outlet structure and a sample of recent purchasing data. Our F&B analytics team builds the model and delivers the report post-show.

KEY STAT

30-45 days

That is how long it takes for F&B purchasing decisions to appear in your cost data. PurchasePlus makes it real-time.
